	72:18 Q. Have you ever talked directly to Intuitive		V1M.23
	72:19 about the resetting activities that Restore has		
	72:20 engaged in?		
	72:21 A. No.		
75:17 - 75:18	May, Kevin 2022-11-03	00:00:04	V1M.24
	75:17 Did that harm cause any delay to Restore's		
	75:18 business?		
75:20 - 76:01	May, Kevin 2022-11-03	00:00:32	V1M.25
	75:20 THE WITNESS: Well, it absolutely caused		
	75:21 delays and harm to our business. We had been		
	75:22 counting on the revenues that we were generating	g	
	75:23 from the repair business to fund being able to do		
	75:24 additional R&D efforts, to grow the business, and to		
	75:25 grow the Xi business and to do the research and

	97:05 Q. How confident can you are you that		
	97:06 Restore will be able to develop the technology to		
	97:07 repair X- and Xi-compatible EndoWrists?		
	97:08 A. Extremely high.		
112:19 - 112:22	May, Kevin 2022-11-03	00:00:11	V1M.32
	112:19 Q. Based on your 20 years of experience in		
	112:20 the industry, do you believe that repairing		
	112:21 EndoWrists and resetting the counter puts patients		
	112:22 at risk?		
112:24 - 113:05	May, Kevin 2022-11-03	00:00:22	V1M.33
	112:24 THE WITNESS: The risk is no more than the		
	112:25 original manufacture. The risk is the same as the		
	113:01 original device. We are not adding any additional		
	113:02 risk to it, and we've gone to great lengths to		
	113:03 through our testing to demonstrate that it does not		
	113:04 provide any additional risk than the original		
	113:05 device.

	115:07	we've ever serviced or repaired.		
	115:08 Q	. Can you give me some examples of more		
	115:09	complicated devices that you service or repair?		
	115:10 A.	Yes. Rigid and flexible endoscopes are		
	115:11	significantly more difficult. The the optical		
	115:12	properties and the optical alignment and the the		
	115:13	characteristics of a rigid endoscope are more		
	115:14	complex than this EndoWrist device.		
	115:15	And then the flexible scope business, as		
	115:16	you guys know at at SIS, is an extremely		
	115:17	complicated device. It has an integrated camera		
	115:18	system, integrated with a lumens and working		
	115:19	channels and fiberoptic illumination, and very		
	115:20	delicate and intricate articulation.		
	115:21	And then the lengths are considerable on		
	115:22	those. They're they're up to 6 to 7-foot long.		
	115:23	They have electronic components that carry a signa	ıl	
	115:24	back from the camera all the way from the distal tip	p	
	115:25	that's inside the patient, all the way back to a		
	116:01	monitor and a camera control unit that's at bedside		
	116:02	near the patient.		
	116:03	Flexible scopes are significantly more		
	116:04	complicated and integrated, and they have much mo	ore	
	116:05	involved articulation properties in them.

	117:12 A.	I would say around January 2020. We
